

OUTFLANKER

Outflanker is a beautifully-bred son of Danzig, from the immediate family of A.P. Indy and Summer Squall, and is sire of 14% stakes horses from his first four crops.

Outflanker is not only by Danzig, but is out of a mare by Alydar. This makes him a natural for **Mr. Prospector** line mares. There have been almost 100 stakes winners bred on a Danzig/Mr. Prospector cross, and Alydar, a close genetic relative to Mr. Prospector also goes very well with this strain. Outflanker already has a stakes winner on this cross, out of a mare by Unreal Zeal. Danzig has also done well with **Raise a Native** through **Exclusive Native**, and the Raise a Native line also appears in an Outflanker stakes winner through Alydar's close relative **Raise A Cup**.

Danzig line stallions have been tremendously successful with mares descending from **Turn-to**. Particularly successful branches of this line with Danzig include **Roberto**, **Halo**, **Sir Gaylord** and his son **Sir Ivor** and **Cyane** and his son **Smarten**

Outflanker is from the immediate family of **A.P. Indy**, and he and other sons of his sire, **Seattle Slew**, should work well here. Other branches of the **Bold Ruler** line should prove effective here, including **Bold Bidder** through **Spectacular Bid** and **Cannonade** and **Raja Baba**. Outflanker has a stakes winner out of a mare descending from Bold Ruler through **Secretariat**. Bold Ruler is by Nasrullah, and Outflanker has also combined successfully with another branch the Nasrullah sire line, that of **Never Bend**.

Danzig line stallions have worked very well with mares descending from **Ribot** through **Graustark**, **His Majesty** and **Hoist the Flag**. We also find more than 30 stakes winners by Danzig line stallions out of mares from the male of **Damascus**, and 20 out of mares descending from **Buckpasser**.

Other strains which have been outstanding with Danzig line sires, and should do well here are those of **Sharpen Up** and **Blushing Groom**.
